

Ion Networking

Ion Networking has been providing the Town of Poland with exceptional service for over 6 years. They are skilled, qualified professionals that clearly take pride in their service and stand behind it.

As our technology continues to grow and change it is vital that we have a solid support link that we can count on. Ion Networking is that company. They are ready to handle whatever our needs are in a timely manner, and I have never experienced an issue they could not resolve.

Ion Networking has proven time and time again to be an essential key in the success of our network operations. Their fees are reasonable and work with our town budget. The entire Ion Networking team is professional and friendly and easy to work with.

Based on this experience, I highly recommend Ion Networking to any business that is looking for a dependable and conscientious computer support service.

Rosemary E. Roy
Executive Assistant
Computer Systems Manager
