

### ***Ion Networking***

As Finance Director for the Town of Yarmouth I also oversee technology for the Town Hall and other departments within the Town.

We started using the services of Ion Networking back in the Spring of 2009 for monthly network administration of our two servers and to serve as our “Help Desk” for desktop and printer problems that can’t be solved internally.

We recently worked with Ion Networking to take our e-mail system in-house using Microsoft Exchange Server and to set up an automatic backup of our files through an online service provider.

We have found all the employees of Ion Networking to be knowledgeable, professional and friendly. Their employees are able to communicate about technology at a level that our employees can understand. They are easy to reach and have a great response time. I would highly recommend this company to anyone looking for IT services.

Maura Halkiotis  
Finance Director  
Town of Yarmouth, Maine
